Morning David,

Your current plan does not have the funding for a fold away wheelchair, however once the Functional Capacity Assessment is completed by the OT, we will put in for a review, and request it in the next plan - (as the NDIA requires a Functional Capacity Assessment to determine needs, based on the recommendations of the OT).
The NDIA are very much evidence based, so when the OT comes to do her assessment please make sure you ask her to assess you for any Assistive Technology items you require (wheelchair etc…) so that she can assess and include it in her recommendations. The same goes for the housing, the OT will need to assess your current living arrangements and determine whether alternative housing options are required. Then once we have her recommendations, we can request the NDIA to include funding in the next plan.

Your current plan only has enough funding for a Functional Capacity Assessment in this plan (Capacity Building section). You currently do not have a Capital budget ( which covers for Assistive Technology).

**Also, if possible, can you please forward to me any reports that you have from your Specialists explaining the extent and impact of your condition, as this will really help us create a case for more funding in the next plan.
