Natalie was happy to see me and stated she had been looking forward to the meeting. Natalie has paraneoplastic Brainstem encephalitis due to side effects of chemotherapy and she has been living with this condition for 3 years. Natalie stated she has recently purchased a bed through the NDIS and this has assisted with her breathing at night but it continues to be an ongoing issue. Natalie stops Breathing while she is lying down due to her Brain Damage this is not something that will ever get better. Natalie has a support worker everyday and over the weekend however the NDIS had taken the presence of her 14 year old sin as an informal support and has not funded a support worker at night. Due to the rarity of her condition there aren't many specialist that have experience dealing with her symptoms and ongoing care . I spoke to Luke on my return to the office and he stated he had an old college that was a neurological OT and would contact him to see about getting Natalie Assessed. Natalie self manages her funds and believes she will not have enough to get to the end of the plan so we are going to work towards getting reports in place to go for a change of circumstance.
