Tara who is the nominee of 9-year-old Oscar came to the app today. she went through lots of issues because of his ADHD, Diabetics and Insulin injection (minimum 4 times a day), intellectual disability, separation anxiety, sensory processing, lack of sleep(using medication on a daily basis)and recently he has been diagnosed for ODD (Oppositional defiant disorder)which affects his functionality and also his mother advised he had a brain tumour from his childhood.
Mom is the carer of him, and Oscar's father has level 4 kidney disease and she afraid Oscar could have the same issue in future and Mom believes that he is not able to cooperate with caring responsibilities of Oskar.
also, Tara stated that she lost her father as he hanged himself and Tara's Mum who is the grandmother of Oscar living with them, she stated she is 69 years old and has lots of arthritis and rheumatic disease and she could hardly walk and could not be a capable carer to look after Oscar as due to his Autism and ADHD he is a great runner, and the grandmother could not catch up with him.
Mom stated Oscar seems overweight for his age and due to her muscle issues, she is not able to sit properly, and she believes in that due to all these underlying problems his functional capacity is diminishing recently.
Mom stated Oscar has an issue to go to the toilet and, he is a big lover of water and likes to go to the bath every day. but the bathtub is so deep and unpractical that when he gets into that it is hard for him to get out of it and their bathroom needs to have a great change to meet Oscar's demand.
Mom advised she is between back-and-forth phone calls with NDIA to consider her situation and all of the barriers that Oscar has on his way for review the plan and asking for more fund on to the plan to improve Oscar 's functionality.
At the end, Tara submitted all the specialist diagnoses from Podiatrist, Psychologist, Psychiatrist, and hospital and all. them has been copied for FFG to speak on behalf of him with NDIA and she has been advised to refer to the neurological psychiatrist from Spectrum Clinic for the second opinion for his Autism level as his functionality has been deteriorated.
